2 Years

Total fees

₹ 62,000

Sambalpur University

Sambalpur University is a state university under the University Grants Commission, Government of India. The Sambalpur University Act was passed by the Odisha Legislature on 10th December 1966 to fulfill the long-cherished dream of the people of Western Odisha for the establishment of a university. The University started functioning on 1st January 1967 with Prof. Parsuram Mishra as the first Vice-Chancellor. The University was inaugurated on 4th January 1967 by Hon'ble Chancellor A.N. Khosla. The University started functioning in 1967 in a rented private building at Dhanupali, Sambalpur, and in the Government building at Ainthapali, Sambalpur from 1968-72. In the year 1973, the University was shifted to the present campus named Jyoti Vihar at Burla.

MBA (Production & Operations)

Highlights

- ◆ A structured open and distance learning format that helps learners pursue production, operations, and process management with continuity and manageable academic progress.
- ◆ Subject areas such as Business Statistics and Analysis, Managerial Economics, Business Environment, and Business Communication make the course relevant to learners comparing similar programmes.
- ◆ Designed to strengthen both conceptual understanding and communication in discipline-specific contexts.
- ◆ Focuses on practical interpretation, case-based thinking, and problem-solving linked to manufacturing processes, service operations, and productivity constraints.
- ◆ Supports academic progression and career exploration across operations, production planning, process improvement, and quality-support functions, including areas such as Operations Manager, Supply Chain Analyst, and Production Planner without making unsupported placement claims, with added focus on domain curiosity.

Learning outcomes

- ◆ Within MBA (Production & Operations) from Sambalpur University, relate theories, methods, or tools from Business Statistics and Analysis, Managerial Economics, Business Environment, and Business Communication to manufacturing processes, service operations, and productivity constraints.
- ◆ Address quality, capacity, scheduling, and efficiency challenges through structured reasoning and subject-specific approaches.
- ◆ Critically evaluate operations decisions balancing cost, quality, delivery, and people while maintaining efficiency, consistency, and continuous improvement.
- ◆ Develop clear process improvement notes, production plans, and operational reports for assignments, projects, or professional communication.
- ◆ Use the learning foundation to plan further academic or professional growth in operations, production planning, process improvement, and quality-support functions, including areas such as Operations Manager, Supply Chain Analyst, and Production Planner, while strengthening domain curiosity.
